Evening Brief

Date/Time Stamp: Sunday, August 07, 2016 - 10:45 PM

Weather Summary

Heavy Lightning Activity occurred during the past 48 hours across much of Idaho into Wrn WY into Nrn UT and Ern NV. Holdover potential highest over Idaho, much less over Ern NV and Utah where wetting rains also occurred.

A drying trend thru this coming week

There could be near critical WSW Zephyr winds coming off the Sierra Front at times, where fuels remain critically dry. Even southern areas should very slowly dry out as the Monsoon shifts south and east out of our entire region...but briefly brushes southern and eastern Utah Wednesday.

Preparedness Levels

Current:

Great Basin	4
National	3

Great Basin Fire Activity: Moderate Initial Attack

New Fires and Acres: 35 fires for 8,333 acres / 11,631 Large Fire Growth

Great Basin Fire Potential Summary

*** Fuels at Record Dry Levels in Many Areas over the Northern Half of the Great Basin ***

ERCs which have recently decreased significantly **into the 90th to 97th percentile** across most areas (except for the southern 3rd of the Great Basin) will pose concerns for both lightning and wind effects over this weekend. However, with thunderstorms turning wetter by Sunday in northern many areas, ERC's will be going down a bit across Idaho and western Wyoming.

Fuels will remain most critical across some areas of Western and Northern NV which have not had widespread wetting rains for nearly 2 months.

Live fuel moisture across much of the northern half of NV, northern UT and parts of ID are near or at record dry levels as well.

These existing extremely dry fuel conditions across Idaho/Western and Northern Utah/Wyoming will play a critical role in fire potential for holdovers from recent lightning, or new lightning starts.

For more detail, see Great Basin 7-Day Fire Potential Outlook

Resources:

- Great Basin Team 6 IMT 2 Chadwick mobilizing to ID-BOF Pioneer North. Inbrief Tuesday August 9th at 1400.
- There are 3,003 personnel committed to large fires within the Great Basin
- 216 Engines Assigned
 - 14 Engines currently on Preposition/Staging orders
- 90 Crews Assigned
 - 8 Type 1 IHC orders pending for Great Basin incidents
 - 8 Type 2 & T2IA crew orders pending for Great Basin incidents
- National and initial attack resources within the Great Basin are heavily committed. Competition for resources is substantial.
